

Invites you to attend the April ASPEN Webinar Critical Care Nutrition: Adults and Pediatrics

Wednesday, April 18, 2018

4:00 pm - 5:30pm CST (Registration starts at 3:30 pm)

Texas Children's Hospital - Mark Wallace Tower Conference Room (3rd floor)

*Signage with directions will be posted the day of the event

Learning Objectives

1. Describe guideline recommendations for use of exclusive and supplemental parenteral nutrition in the critically ill adult.
2. Identify and appraise landmark randomized controlled trials comparing early enteral versus early exclusive parenteral nutrition in critically ill adults.
3. Identify and appraise landmark randomized controlled trials comparing early enteral plus supplemental parenteral nutrition to enteral nutrition alone.
4. Cogitate on scenarios for exclusive and supplemental parenteral nutrition.
5. Describe long-term parenteral nutrition lab monitoring in the inpatient & outpatient Settings
6. Define the role of levocarnitine in parenteral nutrition
7. Identify strategies to reduce the incidence of Central Line Associated Blood Stream Infections related to parenteral nutrition use in the pediatric critical care setting

Faculty and Topics:

Updates on Use of Early Exclusive and Supplemental Parenteral Nutrition in the Critically Ill Adult

Jayshil Patel, MD, Associate Professor of Medicine, Division of Pulmonary and Critical Care Medicine, Medical College of Wisconsin, Milwaukee, WI

Parenteral Nutrition in the Pediatric Critical Care Setting

Michael Haight, MD, MHA, Director Chief, Pediatric Gastroenterology, UCSF Fresno Pediatrics, Fresno, CA

Moderator
